

# Elcin Quliyev

## Python Developer

elcinquliyevm@gmail.com | +994(55)785-62-77 | Azerbaijan, Baku | Github | LinkedIn

### Portfolio

## Profile

I am a 24 years old software engineer mainly specialized in Python/Django. Being very inspired developer I am looking for new opportunities in my professional career. Currently working in a company as Software Engineer, providing technical support on several projects simultaneously, mostly based on marketplace-style projects, and guiding students as Web Development Instructor in the evenings.

## Professional Experience

### **Bol-bol.az, Konum-az, Python Developer**

08/2023 – present

- In Next.js, routers are automatically set based on the file structure. This makes it easier to organize pages and is convenient to manage large applications.
- React.js offers a component-based approach to UI (user interface). Each component is associated with its own state and behavior. This makes the code easier to manage and reuse.
- Writing a Python script to automate a task (sending email, gathering data )
- Creating a small web app using Django to display products listing or customer informations
- Assistings in the creation of a Python- based REST API that interacts with a database

### **JET Academy - Python Web Development Instructor**

05/2023 – present

- Introduction to frameworks like Django for building basic web
- Python fundamentals to advanced topics. This may include concepts such as data types, control flow, functions, object-oriented programming (OOP), web development, databases and libraries like NumPy and Pundas.
- Writing functions, passing parameters and understanding scope and return value
- Encourage teamwork by assingning group projects where students can collaborate and apply Python inn real-world scenarios.
